TRAINING CALENDAR

Because Quality Matters
ISO 9001:2008 CERTIFIED

Session 1

MARCH

March 7	Ultrasound Basics
March 8	Multivendor Accreditation PM/DICOM
March 9-10	Philips iU22/iE33
March 13-14	Philips EPIQ 5/7
March 21	Ultrasound Basics
March 22	Multivendor Accreditation PM/DICOM
March 23-24	GE Logiq E9/Vivid E9
March 27-28	GE Voluson E8
March 29-30	GE Voluson E10

APRIL

April 4	Ultrasound Basics
April 5	Multivendor Accreditation PM/DICOM
April 6-7	Siemens S2000
April 12-13	Toshiba Aplio
April 24-28	ULTRASOUND BOOT CAMP
April 24	Ultrasound Basics/Multivendor Accreditation PM/DICOM
April 25-26	Philips iU22/iE33
April 27-28	GE Logiq E9/Vivid E9

Session 2

JUNE

June 20	Ultrasound Basics
June 21	Multivendor Accreditation PM/DICOM
June 22-23	GE Logiq E9/Vivid E9
June 26-27	GE Voluson E8
June 28-29	GE Voluson E10

JULY

July 11	Ultrasound Basics
July 12	Multivendor Accreditation PM/DICOM
July 13-14	Siemens S2000
July 17-18	Toshiba Aplio

AUGUST

August 1	Ultrasound Basics
August 2	Multivendor Accreditation PM/DICOM
August 3-4	Philips iU22/iE33
August 7-8	Philips EPIQ 5/7
August 21-25	ULTRASOUND BOOT CAMP
August 21	Ultrasound Basics/Multivendor Accreditation PM/DICOM
August 22-23	Philips iU22/iE33
August 24-25	GE Logiq E9/Vivid E9

Session 3

SEPTEMBER

September 12	Ultrasound Basics
September 13	Multivendor Accreditation PM/DICOM
September 14-15	Siemens S2000
September 18-19	Toshiba Aplio
September 26	Ultrasound Basics
September 27	Multivendor Accreditation PM/DICOM
September 28-29	Philips iU22/iE33

OCTOBER

October 2-3	Philips EPIQ 5/7
October 10	Ultrasound Basics
October 11	Multivendor Accreditation PM/DICOM
October 12-13	GE Logiq E9/Vivid E9
October 16-17	GE Voluson E8
October 18-19	GE Voluson E10
October 23-27	ULTRASOUND BOOT CAMP
October 23	Ultrasound Basics/Multivendor Accreditation PM/DICOM
October 24-25	Philips iU22/iE33
October 26-27	GE Logiq E9/Vivid E9

On-Demand Classes

Don't see what you're looking for? The following classes are available upon request – contact us for more information.

- Siemens Sequoia
- GE Logiq P5, Vivid 7™
- Philips HD11/Envisor
- Multivendor Portable Ultrasound Systems
- Ultrasound Applications for Service Engineers
- NFPA99 Electrical Testing Requirements for Ultrasound
- Optimize performance of your TEE transducers through proper care and handling
- Networking Basics for Ultrasound
- Making a successful transition to in-house support of ultrasound systems
- Reducing ultrasound service costs
- Minimizing repair costs while maximizing the life-cycle of your ultrasound transducers
- TEE Transducers: Industry best practices and troubleshooting
- First Look – First response troubleshooting
- How to Use the Phantom – Verifying Image Quality
- Accreditation Compliance for Ultrasound

WE CAN HELP YOU TAKE ROI TO A WHOLE NEW HIGH

Comprehensive Training Programs to Keep Your Technicians Up to Date and Increase Your Uptime Year Round

You did your research, bought the best equipment, secured the best warranty, and set your team up for medical and financial success. And you built an in-house team to maintain and repair your systems, potentially saving you thousands a year in service costs. Now you just need to keep your team up to date on all the latest developments, service protocols, and insights for keeping new and old equipment performing when you need it most: 24/7. This is where partnering with Conquest Imaging makes sense, and is the difference you need to stay ahead of demand and budgets.

The leading provider of ultrasound training programs, Conquest Imaging helps in-house imaging teams stay up to date and maintain high levels of efficiency with in-depth training programs that keep staff up to date and productivity high.

Browse our course descriptions, review our schedule, and book the right event for you and your team.

TRAVEL SAVINGS PACKAGE

Budget tight? Not enough time to research travel options? We can bundle airfare, hotel and tuition into one affordable price and package.

TOTAL ACCESS PROGRAM

You can get guaranteed access to every class we teach by securing a seat in advance. For one low annual fee, we'll save a seat for your company to use for anyone you choose, and give you a savings of 60% off regular pricing at the same time.

CUSTOMIZED CURRICULUM

Is your team a bit ahead of the curve? Need specific help? Or just a refresher course? Our team of experts can create a customized course for your team at our location or yours. Personalized sessions can be built for any topic and any budget.

Train with the Industry's Best

- Join others from the industry in our regularly scheduled classes.
- Secure a spot at all our classes for a discounted rate.
- Create a custom training program with one of our experts.
- Start today! Contact us at 866.900.9404 or email training@conquestimaging.com.

"Training could not have been better...
Already paid for itself." - C. Steckman

For a free consultation about your training needs, and customized prices for individual and group packages, call our experts at 866.900.9404.

LEADING THE INDUSTRY WITH TRAINING

THAT DELIVERS ROI FOR ANY BUSINESS

Conquest Imaging's training programs are led by leading experts in ultrasound technology with a proven record for delivering content that makes a difference. Our goal is to provide the information, skills, and efficiencies for your team that will be the difference between meeting your budget goals or not. Here's an overview of our most popular courses:

ULTRASOUND BOOT CAMP

Our Boot Camp program is designed to help both new and experienced biomed professionals develop a comprehensive knowledge of preventative and maintenance skills which they master for various platforms and equipment. This program covers a full week of training, beginning with Ultrasound Basics, Accreditation Compliant Ultrasound Preventative Maintenance, and Multi vendor DICOM, followed by advanced training on the GE Logiq E9, Vivid E9, Philips iU22, and iE33 platforms.

ACUSON/SIEMENS SYSTEMS

Participants are given in-depth instruction and hands-on experience covering the technology, system design, operation and troubleshooting methodologies for each ultrasound system. They will leave with a full understanding of how to provide effective and efficient service for Siemens/Acuson systems.

PERSONALIZED TRAINING AVAILABLE

We can customize training programs specific to your needs and deliver at our training center in California. Or we can do an "On the Spot" class at any location you choose. Either way, you direct the curriculum around what matters most to you.

TOSHIBA SYSTEMS

This course will help participants fully understand how to provide optimum ultrasound service for Toshiba Aplio systems. Attendees will complete in-depth studies of the technology, system design, operation and troubleshooting methodologies for these machines.

GE SYSTEMS

This course covers the technology, system design, operation and troubleshooting methodologies for GE's systems such as Vivid E9, Logiq E9, Voluson 730, Voluson E8.

PHILIPS SYSTEMS

For each ultrasound system, participants will study the technology, system design, operation and troubleshooting methodologies in order to fully understand how to provide the best possible service for the Philips EPIQ, and iU22/iE33 systems.

**"Troubleshooting, repairing,
disassembly, all outstanding!
The instructor was excellent.**

- J. Diaz-Otey

HERE'S WHAT OUR TRAINING PARTICIPANTS HAVE TO SAY...

Training at Conquest Imaging will make a difference for your team, and enable you to serve your customers and patients more efficiently than ever.

➤ "Having been in the industry for 15 years, I appreciated Jim's teaching style and the fact that I had hands-on time with the system. The environment was friendly and open. I feel better equipped to go out and service my customer's equipment. That is saying something when the class I took is the Philips iU22/iE33."

*J. Browning, Ultrasound Field Service
Philips iU22/iE33 Student*

➤ "Everything was great ... Great class. Lots of hands-on work, and very knowledgeable instructor. Very professional and informative courses. Great mix of educational lectures and hands-on-training."

*Justin Emmons, BMET
Sutter Health eQuip, GE Logiq E9 Student*

➤ "Very knowledgeable and professional instructor. Covered all aspects of the functionality and different parts of the ultrasound more clearly and thoroughly than the classes I had with the OEM."

*E. Almuaalem, Johns Hopkins Hospital
Philips iU22/iE33 Student*

➤ "I see Conquest Imaging as a perfect 'Bridge Solution,' while transitioning from costly OEM parts & service contracts to our ultimate goal of in-sourcing service with our own internal resources."

*J. Sandoval – Manager, Biomedical Services Dept.
Ultrasound Training Student*

➤ "Partnering with Conquest Imaging to bring ultrasound service in-house was one of the best decisions I made. Conquest Imaging provided the training and plan and now provides the parts, probes and support. It is a win, win for UCSD."

*Richard Rambo
Ultrasound Training Student*

➤ "I really liked learning the practical skills like which order you should take things apart and little tricks to do it, things to watch out for, and hearing about high-failure items. I think these will be the most useful things to take back to my job."

*A. Hardy, Biomedical Imaging Technician
Philips iU22/iE33 Student*
